Response to Amendment

This Office Action is in response to Amendment filed on 01/07/2005.

Claims 1, 3-6, 8-13 are presented for examination.

Specification

The specification is objected to for the following reasons.

The specification includes incorrect reference signs 'second surface 14' and 'IC carrier 10' of Figure 1. It should be 'second surface 114' and 'IC carrier 110'.

Correction is required.

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-6, and 8-13 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Applicant Admitted Prior Art (AAPA) in view of Patterson et al. (U.S. Patent No. 5,080,958).

Claims 1, 3-6, and 8-13 are rejected for the same reason as set forth in the previous Office Action.

Response to Arguments

The applicant states in the amended independent claims 1, 5, and 6 that at least one of the dielectric layers is a ceramic dielectric layer and wherein the dielectric layers are formed via a built-up method. However, Background of the Invention on page 2, lines 14-15 (in the specification of this application) discloses “the IC carrier 110 can be classified as an organic substrate or a ceramic substrate according to the dielectric material used.” Figures 1, 2 and 3 of the prior art also show the dielectric layers are formed via a built-up method.

Therefore, for the above reason, it is believed that the rejection should be sustained. Feature of an invention not found in the claims can be given no patentable weight in distinguishing the claimed invention over the prior art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
